

## **Automatic Satellite Dish for Best High Definition Coverage**

Automatic satellite TV system is one that will seek and lock on to a satellite without the intervention of a user once it is switched on. These satellites are easy to use. Once you have switched on the system and selected the satellite you want, it automatically on its own unfolds itself and seeks the satellite. It takes around 25 – 55 seconds to find the satellite. Some of these automatic systems come with safety features. If you start your motorhome which is fitted with this automatic system, it will automatically fold itself as a safety precaution.

## **The Advantage of using a Satellite dome or a Satellite dish**

A Satellite dome sits higher than a satellite dish. Some domes come in smaller forms of around 30 cm. If you like to watch satellite TV when you are moving then dome is the best option as you get 'In Motion' domes which help you to watch TV when in motion. If you have 'in motion' dome you can comfortably park at the camping site where you can get a signal.

Dish satellite is better as it is larger and has access to LNB. Since the dish is larger the footprint area is increased. There are a large number of domes available if you like to choose one for you. There are different types of satellite systems, the automatic satellite system, [Caravan Satellite Kit](#), house satellite system, caravan wall fittings and internet satellite system. According to your needs you can choose one that meets your requirements.

## **The Automatic Satellite System with GPS**

One of the latest satellite systems to reach the market is Satking. It is far advanced than others that have so far been in the market. It is built with the best design, consisting of a flat panel antenna. VAST and Foxtel satellite TVs are best suited for this antenna with its dual LNB tuner.

This satellite system is the best and comfortable to use. When you turn it on the built in GPS will locate the satellite quite fast. The other benefit of this system is amazing. If you overlook to turn the dish to the house position it will come back on its own once the vehicle moves above 10kph. It also occupies a

smaller space on top of the vehicle. Flat panel satellite TV antennas offer a stronger signal than satellite TV dishes.

## **The Benefits of Automatic Satellite Systems**

The Benefits of automatic satellite TV system are vast. With this system you can connect anywhere in the world. Using this system voice video and data can be accessed. This system is reliable providing constant connectivity when other networks fail. Businesses are doing well using this system since there is connectivity and back-up system.

Satellite systems are secure compared to other world networks. These systems are ideal for government, military and enterprise. Quick marketing and upgrading can be done using this system. New marketing locations are easily added to the system. This technology helps you to communicate with people living in difficult terrains which are difficult to reach by other means.
